DETAILED ACTION

1. This Office Action is a response to the communications dated 10/06/04 and the Feedback from the USPTO Publication Office required new abstract due to the discrepancy founded in the Applicants' amendment dated 07-01-03. In the amendment dated 07-01-03, there was a typo in "cancel lines 2-13". It should read -cancel lines 2-3-- instead.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 28, please kindly cancel the abstract and replace the abstract with below:

ABSTRACT OF THE DISCLOSURE

The electrical signal contains signal information and redundancy information for the signal information determined from the signal information. A dependability degree is approximated from the electrical signal for forming at least one signal value, and the signal value is determined dependent on the dependency degree. This ensues in that a target function that contains a model of a transmission channel is optimized, and the optimization ensues upon employment of the target function.
